SDG6: CLEAN WATER AND SANITATION

The World Islamic Sciences and Education University is committed to providing safe drinking water, sanitation, and hygiene facilities on its campus. The university's Public Services Department is responsible for maintaining the cleanliness of all university facilities and ensuring good health conditions for the students and staff. They also prioritize public safety matters and maintain beautiful green spaces on the campus. The department supervises all kiosks and restaurants within the university and ensures their compliance with public health and safety conditions.

The World Islamic Sciences and Education University is aware of the health risks associated with unsafe drinking water and poor sanitation, such as malnutrition and stunting. Therefore, they have implemented modern monitoring systems to track water consumption rates and have standardized the consumption amounts for individuals and services to meet international standards.

In addition, The World Islamic Sciences and Education University has taken measures to

prevent the spread of COVID-19 by providing WASH services and infection prevention control in health facilities. They have also implemented government policies to rationalize water consumption and developed a detailed irrigation and water consumption program.

The Department of Public Services provides safe water for various uses in university buildings, and the university closely monitors water distribution to ensure delivery to all buildings and amenities.

The World Islamic Sciences and Education University collaborated with the Ministry of Water and Irrigation and the German Agency for International Cooperation GIZ on a religious awareness project promoting water conservation from 2018 to the present. It ranked fifth among Jordanian universities. This confirms that all the aforementioned efforts align with SDG 6.
