SDG13: CLIMATE ACTION

The World Islamic Sciences and Education University acknowledges the real and undeniable threat of climate change. Its effects are already evident, and they will be catastrophic unless local and international communities take action. The World Islamic Sciences and Education University believes that we can protect the planet by educating people, encouraging innovation, and fulfilling our climate commitments. This will also create new job opportunities, update infrastructure, and promote prosperity.

In addition, The World Islamic Sciences and Education University contributes to achieving a sustainable environment and campus through specialized courses on physics and earth sciences and their teaching methods. The World Islamic Sciences and Education University has

developed a climate action plan to share information with relevant departments.

The World Islamic Sciences and Education University worked with a group of students

on a voluntary basis organized at the local level and in cooperation with the American Andrews University and the Lebanese University of the Middle East. The students were directed towards specific tasks to perform a variety of service and humanitarian jobs for individuals at the local community level.

With all its buildings, The World Islamic Sciences and Education University aims to provide a healthy environment for its employees. The university conducts educational courses and campaigns to address the harms and dangers of smoking. Our university cooperates greatly in reducing smoking.

<https://www.facebook.com/TobaccoControlClubWISE>

Moreover, a special page called 'Anti-Tobacco Club' was created on Facebook to raise awareness among students to reduce the phenomenon of smoking and preserve the environment. Specialized committees work to enhance cooperation between school students and their colleagues in spreading awareness of the dangers and harms of tobacco. The university library, in collaboration with the Anti-Tobacco Club, organized a training course to prepare trainers in health and psychological awareness of tobacco addiction.

Finally, The World Islamic Sciences and Education University contributes to the development of the (SDG13) 'CLIMATE ACTION' by publishing different publications under this (SDG13). One of the recently published research: Alnabulsi et al (2023). Publishing the paper entitled "Measuring the impact of renewable energy consumption on economic growth in Jordan during the period 1990-2020".
