

SDG15: LIFE ON LAND

Our university has supported terrestrial ecosystems through education as awareness campaigns were conducted on increasing the agricultural area and initiating agricultural activities such as afforestation in empty spaces.

This project was launched on our university to increase the green spaces and act as model for environmental awareness.

Additionally, student canteens help ensure a reduction of plastic bags. Consequently, plastic bags will not be provided for take-away meals. Furthermore, our university worked to protect its campus from pollutants in many ways, including providing environmentally friendly containers and other such recyclables. <https://alwakaai.com/article/355375>.

Finally, **The World Islamic Sciences and Education University** contribute to development of the (SDG15) ‘LIFE ON LAND’ by publishing one publications under this (SDG15). Masadeh, et al. (2019). Publishing the paper entitled “Sea Lion Optimization algorithm”.
