## SDG15: LIFE ON LAND

Our university continues to work on projects to increase the green spot inside the university campus, where concrete bases were built to plant trees in the form of car shades in parking areas instead of iron shades. During the past year, as part of the green space projects, the university, through the engineering department, systematically planted areas surrounding the stairway path leading to the colleges.

**The World Islamic Sciences and Education University** seeks to reduce the use of plastic materials, and this is in line with the policy of the Jordanian Ministry of Environment to improve the quality of life and mitigate the negative effects on the environment and human beings. The university announces the policy of limiting the use of plastic materials on its official website.

**The World Islamic Sciences and Education University** deals with solid waste according to the latest international concepts related to waste solid, which includes:

- A. Prevention: It is represented in reducing the production of solid waste in the university.
- B. Minimization: It is represented in rationalizing the production of solid waste in the university to a minimum possible.
- C. Reuse: It is the reuse of solid materials before referring to waste.
- D. Recycling: It is the recycling of what can be recycled from waste papers, plastics, metals and other wastes recyclable solid. All of these policies are announced in the university's policies guide on its official website.
